## "Please, help me find my mother"

Little Lin San has been wandering all day through the streets of Taipei, Formosa, looking for her mother.

Now it is almost dark and she is cold, hungry and frightened.

Our CCF staff worker found her here, leaning against this rough wall. Lin San looked up and asked, "Please, help me find my mother."

But Lin San didn't know her family name or where she lived. So we took her into one of our Homes and for months advertised in the paper, checked daily with the police—yet never found her mother.

Was Lin San abandoned? Lost? Are her parents even still alive? We will probably never know.

All we can do now is appeal to Americans to help us care for her in a Home where another "mother" will lovingly tuck her into bed every night.

And she is only one of thousands—children who look to us for love and care. Since 1938, Americans have been sponsoring such children, sharing their blessings with youngsters around the world.

For only \$12 a month, you too can help a child like Lin San. You will receive a photograph, personal history and the opportunity to write letters.

Your child will know who you are, and will answer your correspondence. You can send a special gift at Christmas or for a birthday.

You will find that helping a needy child this way is an intimate, person-to-person experience. CCF programs overseas are approved as having met the conditions of registration with the United States AID's Advisory Committee on Voluntary Foreign Aid.

Little Lin San and children like her need your love. So won't you help? Today? Thank you.

**Sponsors urgently needed this month for children in Korea, Taiwan, India, Brazil.** (Or let us select a child for you from our emergency list.)

*Sad and hungry, Lin San asked our CCF worker: "Please, help me find my mother."*

NOW READ WHAT OTHER WOMEN HAVE TO SAY ABOUT THE MARK EDEN DEVELOPER.

Mrs. Margie Davis, Macon, Ga.: "I am so pleased with myself and my developer and so is my husband. I went from a 32A to a 36B."

Mrs. Marjorie Landry, Hatboro, Penn.: "After having three children my bust was a small and flabby 34B and now after only 8 weeks of using the Mark Eden Developer my bust is a round and firm 36D."

Mrs. Myralin Collins, Grand Prairie, Texas: "I can hardly believe my own results. I have increased my bust from a 34B to a 36D in just 30 days with the Mark Eden Developer."

Mrs. James Foster, San Francisco, Calif.: "I have been flat chested all my life. I had tried, without success, many creams, lotions, etc. When I started with my Mark Eden program I only measured 31 inches. Now I have added over 3 inches to my bustline and measure a full 34 1/2."

WHAT IS THE MARK EDEN METHOD? The Mark Eden Method is not a cream, not an artificial stimulator. It is an exerciser that employs special techniques, safely and effectively, with hundreds of women throughout America reporting remarkable results in enlarging, shaping, and firming the bustline.

in half cross stitch. This stitch may be worked from right to left or from left to right, working diagonal stitches over double thread canvas. It forms a straight stitch on the back.

The picture is worked across in half cross stitches as shown in illustration. The equal appearance of finished picture depends on evenness of the stitches.

If piece has become pulled out of shape in working, this can be remedied by correct blocking. Roll piece in damp Turkish towel and leave until thoroughly damp. Then stretch and pin piece face down on a board. Allow to dry thoroughly.

## Fish Bean Bag

This swimming fish is really a lively bean bag toy sure to become a child's favorite companion. It is easy to make from upholstery material, terry cloth, cotton fabric, corduroy or felt.

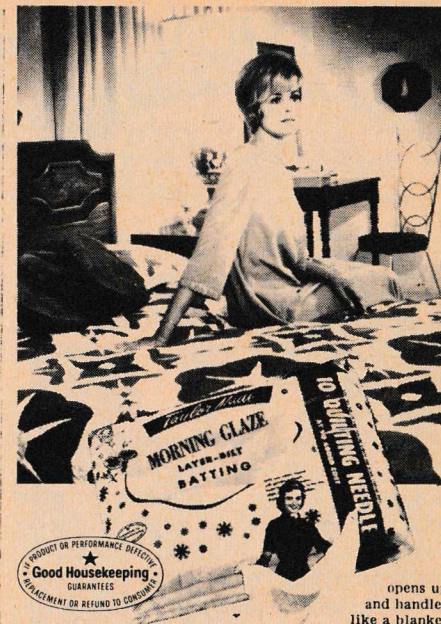

Enlarge outline of fish, using chart for pattern. Each square equals 1 inch. To do this take a piece of paper about 9 x 11 inches and divide into 1 inch squares. Draw portion of pattern that appears in each square on chart to corresponding larger square. Cut out enlarged pattern and lay it on doubled cloth. Trace around pattern.

Allow 1/4 inch for seam allowance. The fabric will determine type of seam to use. If felt is used, sew two pieces together on right side and pink edges. Use embroidery floss of contrasting color, leaving an opening for stuffing. Use buttons for eyes or small circles of felt. Fill with beans. For a soft toy, use nylons, shredded foam or cotton. Whipstitch opening.

Complete design on each bookmark by arranging seeds into flowers, vines, butterflies, etc. Allow to dry overnight, then paint design with watercolors or tempera paints, carefully covering each seed with desired color. Paint must dry for several hours before applying clear nail polish. This gives a protective coat and makes it shine as if enameled. When dry, bookmarks may be cut apart and are ready to sell. Climax a day of fishing with fish fillets rolled up and cooked over hot coals.

## Fish Fillets in Foil

- 6 or more small fish fillets
- melted butter
- onion slices
- lemon slices
- salt and pepper

Dip fish fillets in melted butter and roll up each one. Place one or two rolled fillets in center of each heavy foil square. Add very thin lemon slice and 1 or 2 slices of onion. Season with salt and pepper. Seal foil to make a tight package. Place on grill over medium hot fire and cook about 20 minutes, turning 1 or 2 times. Each person may be served a package or turn back foil and arrange packages on large heatproof platter. Serve with Sour Cream Tartar Sauce.

## Sour Cream Tartar Sauce

Add to 1 cup mayonnaise, 2 tablespoons minced old-fashioned dill pickle, 1 tablespoon minced onion, 1 tablespoon lemon juice, 1 tablespoon parsley, 1 teaspoon each minced fresh thyme, tarragon and a little dill. (One teaspoon mixed dried herbs may be substituted). Add a generous sprinkling of freshly ground black pepper and shortly before serving, fold in 4 tablespoons dairy sour cream.

Barbecued Spareribs are fun to cook and easy to serve.

## Barbecued Spareribs

- 4 to 5 pounds spareribs in two pieces
- salt
- freshly ground pepper
- Barbecue Sauce

Salt and pepper spareribs and brown on grill over moderate fire, turning once or twice. Prepare pan from double thickness of foil to fit spareribs, by turning up edges of foil 1 1/2 inches all around. Miter corners so it will be secure. As soon as spareribs have browned, transfer to foil pan and spoon over about 1 cup Barbecue Sauce. Place pan on center of grill and continue cooking for about 1 1/2 hours longer. Baste with sauce occasionally. To serve, transfer foil pan with spareribs to platter. Ribs separate easily when cut with sharp knife. Makes 6 to 8 servings.

- 1/2 cup honey
- 2/3 cup soy sauce
- 2/3 cup catsup
- 1 teaspoon dry mustard
- 1 teaspoon paprika
- 1/2 teaspoon Tabasco sauce
- 1 clove garlic, finely mashed

- 8 small precooked onions
- basting sauce

Broil 4 to 5 inches above glowing coals until meat is cooked and vegetables have browned. Turn frequently and brush with basting sauce. Makes 8 servings.

## Beef Marinade

To each pound beef cubes, add 2/3 cup cooking oil, 1 teaspoon salt, 1/4 teaspoon coarse black pepper, 1/2 teaspoon thyme, 3 tablespoons lemon juice, 1/2 cup chopped onion and red vinegar to cover. Mix. Cover and refrigerate 2 to 3 hours.

Marinate chunks of lamb and have the guests cook their own kabobs.

### Lamb Kabobs

- 1 cup chili sauce
- 1 1/2 cups French dressing
- 1 tablespoon hickory liquid smoke

artichoke bottoms  
cubed green peppers

Combine chili sauce, French dressing and hickory liquid smoke; mix well. Add lamb and chill 1 hour. Remove lamb and reserve chili sauce mixture. Meanwhile, heat remaining chili sauce mixture over low heat to serving temperature, stirring occasionally. Serve sauce with kabobs. Makes 6 to 8 servings.

# FLOWER and GARDEN

I have been given a mimosa tree as a gift. I would like information on general care of it and what winter protection it must be given. Mrs. G. R., New York.

Your mimosa tree is, no doubt, Albizzia julibrissin, the silk tree. Almost any garden south of New York City will grow "mimosa" but in colder parts of state plant close to house for shelter, give full sun and average soil.

I have a Christmas cactus. It has always bloomed until the last two years. It has been repotted and fed and treated same as other years. Could you tell me what the trouble is? Mrs. E. D., N. H.

I'll bet you have placed it where the light pattern is different. Christmas cactus must have a normal outdoor light cycle—indoor lights interfere and keep plant vegetative. Better place it in a room that isn't lighted at night.

We have a mock orange shrub. Every year near fall the leaves turn a funny brown. Is this caused by bugs or a fungus? All my neighbors have the same trouble. Hope you can help us. Mrs. R. K., Minnesota.

It could be that they are senescent (a nice way of saying "growing old"), but it could also be a mildew fungus easily controlled by regular spraying with rose spray mixtures.

36 • The WORKBASKET

Each year at Easter or Mother's Day I receive an azalea plant and each year before summer is over leaves turn yellow and drop off. I give it sun and water when pot is dry. What else should I do? Mrs. O. V. L., II.

The house plant azaleas are used to greenhouse conditions and don't adapt very well to the garden. But try plunging pot on east side of house away from wind. Water it gently every single day, use iron sulfate in the water to acidify it at least once each month, feed plant with liquid plant food through early part of summer and spray foliage with water daily.

How may I start new plants from a Pyracantha plant? Mrs. H. D. A., Fla.

Pyracantha cuttings can be taken almost any time but in midwest cuttings are best taken in July. By then new shoots have hardened but aren't too woody. Use a reliable root hormone powder and put them down in perlite. Mist leaves three or four times a day. Cuttings usually root in about eight weeks.

I have a 3 year old yellow delicious apple tree I would like to transplant. It is 4 feet high and well branched. How do I go about it? Mrs. A. D., Pa.

In early spring ball the tree by digging a trench around it without cracking soil next to tree. Ball should be about fifteen inches across. Then use a sharpshooter to undercut ball (if you are a beginner maybe you had better wrap ball before you try to undercut it). Dig a large hole at new location, pick up balled tree and reset it at same depth it grew before moving.

Last year my gladiolas bloomed in lovely colors. This year they were all white. What caused them to change color? Is there anything I can do to prevent them from turning all white? Mrs. J. P. Z., Canada.

Vegetatively reproduced plants do not change color unless a virus gets into stock, then colors usually are blotchy. What happens is that barely hardy sorts, frequently brightly colored, are lost while dull colored varieties of a hardier nature thrive and reproduce.

Garden questions are answered each month by DR. JOHN P. BAUMGARDT.

## Ornithogalum

One nice advantage of raising Ornithogalum is that it is a long-lasting flower and may be left on plant or cut and used in arrangements. The blossoms put out a sweet scent in evening and with fragrance of Hoya add a heavenly atmosphere to greenhouse.

I am told that these flowers are imported in large quantities from South Africa. It requires quite some time to get them to us but they open when placed in water and continue to last in bloom for many days.

They grow wild in Africa and Europe and belong to the Lily (Liliaceae) family. Ornithogalum is derived from ornithos, a bird, and gala, milk; however, application of these terms is not clear to the eye or mind.

There are several varieties of Ornithogalum, often referred to as Star-of-Bethlehem and also as Chinchinchee. Some are hardy, some tender. The hardy bulbs do well in sunny or semi-shaded loca-

## Ornithogalum

tions in ordinary gardens and need only be lifted and separated when they show signs of being overcrowded. The tender bulbs, or greenhouse variety, require a night temperature of 55°. *O. thyrsoides* requires a soil containing two parts sandy loam, one part leaf mold and a free sprinkling of sand. They may be potted most any time of year,

making certain that pot is plenty large and that bulbs are just under top surface of soil. At this time they are set aside to take root. Caution must be taken not to over water at this time. When growth is well begun then they may be watered freely throughout growing and flowering season. They are heavy feeders and should be given plenty of any good fertilizer. I prefer cow manure tea. When leaves begin to turn yellow, water is gradually withheld and bulbs are dried off and kept dry until repotting time again.

*O. saundersiae* is often referred to as Glory of The Veldt.

A few hardy kinds consist of *O. umbellatum*, Star-of-Bethlehem, a very pretty plant in rock gardens as it only grows to about 9 inches with green and white flowers in May. *O. pyramidale*, 3 feet, white, is a summer blooming plant, and *O. nutans*, 12 inches, green and white, blooms in spring. *O. saundersiae* is a vigorous, strong growing plant with huge creamy-white clusters, very waxy in appearance. As blossoms mature black "shoe button" eyes will peep from each blossom center. This variety is very healthy and easy to grow.

## Maidenhair Fern

**SOIL**—Two parts sharp sand, 2 parts rich loam, 2 parts leaf mold, 1 five-inch pot of bone meal to each bushel of mixture. Avoid using clay soil, and do not use fresh stable manure or fresh commercial fertilizer.

**WATER**—Liberally during the growing season, but never leave water standing in the pot. Water from below if desired.

**PESTS**—White scale. Hand picking is best means of control.

**HEAT**—Night 55°, daytime 65 to 70°. A moist atmosphere is necessary to good culture of this fern. In some houses it may be necessary to put it in a terrarium or Wardian case to provide the essential humidity.

**LIGHT**—A light place but not in direct sun.

**PROPAGATION**—Old plants after resting may be cut into four parts lengthwise with sharp knife. Plant each quarter in 6-inch pot.

**COMMENT**—Plant should rest in May or when leaves turn yellowish. Cut off all leaves, do not water until first new leaves begin to sprout. Then is the time to re-pot or divide if desired.

## Artic Rock Garden

Gather small rocks 1 inch in diameter. Scrub thoroughly and dry. Arrange in bottom of shallow bowl or glass pie plate. Mix 4 tablespoons salt, 4 tablespoons blueing and 4 tablespoons water. Stir thoroughly to dissolve as much salt as possible. Add 1 tablespoon household ammonia—do not use type mixed with detergent commonly sold for laundry purposes. Stir mixture again and pour slowly over rocks in dish. Be sure that some of the mixture gets on all surfaces of rocks. In a few hours the "garden" will begin to grow. This will depend on dry-

ness of air in room. It likes a sunny location and dry air best and will grow like Jack's beanstalk in such an atmosphere. In a few days a feathery blueish-white growth will cover rocks and probably edge of bowl as well. If spots of color are desired, drop a bit of food color or ink here and there on rocks before growth starts. If garden stops growing, pep it up by carefully pouring more ammonia in bowl. The growth is fragile, however, so place it where it can be seen and admired but not bumped or it will crumble.

## I Show Women How to Make Money at Home in Spare Time

Mrs. Aileen Larson, pictured here wrote, "I make as much as \$60 extra every month, spare time—sometimes more."

Maybe you are one of the thousands of women who could use an extra \$25, \$35 or \$50 a week. If so, you may find the answer right here. With my Plan, you don't need a bit of experience to start earning the extra money you need. Once you get the knack of Invisible Reweaving as I

will teach it to you, you will discover that only two \$5 jobs a day at home will pay you \$240 a month. This is a wonderful opportunity for women who can't hold steady jobs on account of having to take care of children and housework. The work is so simple and easy that a twelve-year-old can do it. # China Painting for Beginners

Dorothy E. Cawlfeld

The art of china painting is regaining popularity. Supplies are inexpensive and easily obtainable. Lessons are readily available either through local groups or correspondence. Books in local library are also helpful. This article will give you a glimpse into the fascinating world of china painting.

One can start with a very limited outfit for around \$7.50—this includes a set of twelve to fifteen colors, mixing oil, china painting

medium, gum turpentine, small palette knife, 6 x 6-inch ground glass palette, three brushes in various sizes and a 6 x 6-inch tile.

Beginners should try a 6-inch plate, tea tile or plain tile first. Start with single wild rose, daisy, violet or a simple fruit design. Violets were selected for design given.

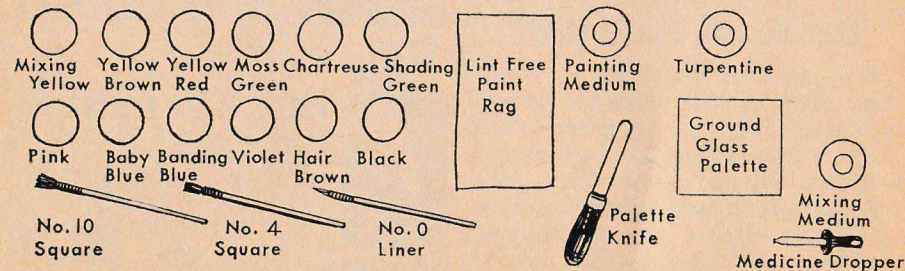

The design may be traced on china with graphite paper or sketched

with china marking pencil.

To mix colors, place powdered color about size of a pea on ground glass palette. With a medicine dropper drop about two drops of mixing oil and grind with palette knife until smooth. Remove pat of color to smooth glass palette. Mixture should stand in a compact pile. Too much mixing oil will cause it to spread out.

Gum turpentine is used to clean brushes, palette and palette knife. Clean ground glass palette each time a color is mixed. It is best to mix all colors and place on palette before beginning to paint. Be sure not to leave dry, unmixed color on palette—it will blow into work and make it grainy.

Practice strokes used in making a violet with a number 10 square shader brush. Clean brush in turpentine, dry thoroughly with lint-free paint rag. Dip brush into painting medium. Fan out brush on palette, mixing oil into brush until bristles are shaped into a smooth, fine line. Use just enough oil to keep brush in shape (so bristles do not separate). If too much oil is used, painting will be sticky and gather lint. It is surprising to see various strokes that can be done with this one brush. Use flat side of brush for

GOOD WORKING SET-UP

broad strokes—turn brush to chisel side for fine strokes.

Do not dip brush into paint. Fill it from side of pat of paint with a circular stroke, working color into brush smoothly. By filling brush in this manner, there will be three color shades—light, medium and dark. Reverse brush to make a stroke for same effect from dark, medium and light. Practice these strokes for violet petals, shading violets darker to center. Petals underneath are shaded darker. Leaves are a darker shade toward flowers. For violet, use baby blue and violet. For leaves, use moss green, a touch of hair brown and shading green for darker shadows. Centers are made with liner brush. Wipe out little white spaces on each side of center and put in little centers with yellow red. Stems are put in with liner brush also. The background is put in with largest brush, using criss-cross strokes to blend colors lightly. Chartreuse and yellow brown are

good background colors.

Skill is accomplished by practice. It is important to practice brush strokes before putting work on china. Practice on a tile or plate that can be wiped off until petals and leaves are satisfactory.

It is important to put paint on very thinly for first fire, getting in design. For second fire, put in shadows and detail. The firing is done much lighter than ceramic firing, but the same kiln is used.

China painting is a most fascinating craft that many women are engaging in nowadays.

Now at last this all-new bug trap can give you insect-free, carefree living this year and for years to come. Your first investment is your only cost. Just plug in this amazing new black-lite electron ray bug killer and it goes to work instantly. This new insect trap is one of the most powerful of its kind on the market today. Its black-lite, developed by General Electric, attracts scores of insects like a magnet, from grass, gardens, foliage and shrubbery. The high-frequency electric grid kills these pests instantly. In no time at all, the entire area, up to 3/4 of an acre, has been cleared of annoying flies, mosquitoes, moths and other flying insects which have always made life miserable for you.

The action is completely automatic. Once you have switched on this electronic insect trap, it continues its silent operation, 100% effective, with no further attention. Compare this with expensive, time-consuming sprays and vile-smelling insecticides; you spray & spray the air only to find, minutes later, you're back to swatting & scratching at the swarms of annoying bugs again. Modern electronic technology has now come up with this new answer to an age-old problem.

**100% SAFE**

FOR ADULTS, CHILDREN, PETS  
BIRDS AND PLANTS

Black-lite insect traps were originally developed for commercial use. These were huge traps used at ballparks, racetracks, picnic grounds, etc. They cost \$1,000 to \$2,000 each; expensive, but they did the job. A number were installed at the N.Y. Worlds Fair where they proved their amazing effectiveness over a 2-year period. Now a smaller model for home use has been developed, and has proved its effectiveness in over 100,000 homes, hospitals, restaurants, hotels, universities, etc. It has been used successfully on farms, shopping centers, golf courses, at swimming pools, and most of all, in homes like yours, inside and outside — on porch, patio & garden areas. You and your loved ones can now enjoy a quiet, restful night's sleep. Your customers or friends can now

enjoy the pleasure of outdoor living & dining in comfort, free of the annoyance of flying insects & pests.

Effective both indoors & outdoors. Sprays & chemicals swiftly lose their effectiveness when used outdoors. Kill-Ray insect killer constantly remains 100% effective both inside your home and outdoors as well. Outside, Kill-Ray has an effective range, in all directions, of up to 30,000 sq. feet. Insects within this huge zone are irresistibly attracted by the Black-lite rays as though by magic. Once they have homed in on the rays, the instant killing power of the electric grid will dispose of them for ever. We wish to quote in part an article from a nationally distributed garden publication with the largest circulation in its field: "We put our trap into operation about mid-July of last year. We were amazed at the effects. We could open our windows; no moths or mosquitoes entered. We could sit out-of-doors & truly enjoy it. Our trap captured from a pint to a quart of flying insects every night. Even our neighbors remarked about the decrease in insects, so we knew the effects were far-reaching enough to cover our own property. All night-flying moths and many destructive day flies as well are attracted to light. We kept ours in operation until after freezing weather, a period of 5 months. The decrease in insect damage in just this short time was noticeable. By putting it into use in early spring, we are hopeful of even better results." Recent tests at the University of Kentucky Agriculture Experiment Station showed experiments since 1962 in other southern states have had very promising results.

Our new 1967 model will give you many years of trouble-free service. There are no moving parts to fail. It is completely silent, and is transformer-operated for maximum safety, featuring solid-state circuitry. This unit, designed for a lifetime of service, consumes only 10 watts and operates for less

than 1 CENT PER DAY. Additional Black-lite bulbs are available in local stores or shipped from factory for \$2. Shaped like a beautiful lantern, it can also be used as an attractive night light. While the Kill-Ray unit weighs only 3 lbs. and is a compact 10" high x 9" dia., its tremendous blitz-like action has the amazing ability to destroy thousands of insects daily, never getting a chance to lay their destructive eggs. In most cases it is their larvae which causes the damage to your plants, trees, clothing, etc.

You no longer need to spend a small fortune for moth-proofing your home. Just figure up how much you spend yearly for insect sprays & moth-proofing products and you will realize what a great bargain our Kill-Ray really is, especially at this pre-season low price. There is no other product in the U.S. today which can offer you this 100% protection at a cost of less than one cent per day. We urge you to give our Kill-Ray a fair 30-day test. Unless it does everything we claim, to your satisfaction, you may return the unit for full purchase price refund and it costs you absolutely nothing!

This insect trap is manufactured by a reliable, well known maker. It is a quality product designed to give many years of trouble-free service. Similar units have been sold for \$25 to \$35. Take advantage now of our pre-season offer and save \$5.00 on one unit and \$12.40 on the purchase of 2. This is the first time we have been able to offer our Kill-Ray for sale to the public by mail-order. Our supply is very limited. Orders will be filled on a first-come, first-served basis. We anticipate far more orders than we will be able to fill. Orders for more than 2 units per customer will not be accepted; orders, however, from hospitals will be given first priority. The sooner you start, the more effective the results. Destroy these pest in the spring before they are able to lay their damaging eggs. Order now as this offer may not be repeated.
